ACI-ICAO Management of Airport Security

ICAO

[Airport Security Diploma](#), [*AMPAP Elective](#)

Delivery: Classroom

Duration: 5 days

The ACI-ICAO Management of Airport Security course provides guidance to aviation security personnel at a managerial level on planning, coordinating and implementing airport security preventative measures and pro-active initiatives that are in accordance with national programmes and airport industry best practices.

Learning objectives

By the end of this course students will be able to:

- Evaluate options, benefits and disadvantages of outsourcing security activities
- Prepare budgetary estimates for financing AVSEC programmes
- Analyze an airport emergency plan and develop security response actions necessary in security emergencies involving aircraft, terminal buildings and airport facilities
- Implement a training programme for airport security and non-security staff
- Develop procedures and mechanisms for reporting and recording security incidents
- Set up and run an airport security committee
- Implement a risk and vulnerability assessment and review processes to prioritize and manage risks

Target audience

- Airport managers and personnel with security responsibilities
- Suppliers and service providers with security responsibility at an airport (e.g., ground handlers, maintenance organization, cargo agents, catering, or airport security providers)
- Civil aviation security regulators

Course content

- The regulatory framework for airport security
- Development of aviation security programmes and Standard Operating Procedures (SOPs)
- Management of response to acts of unlawful interference, reporting and tracking
- Model framework of the components of an airport security programme
- Best practices on the implementation of airport security programmes
- Crisis communication and coordination with other airports, organizations and agencies
- Measuring results and implementing a quality management system
- Security training programmes
- Risk and vulnerability assessment
- Intelligence gathering and relationships with agencies

This interactive course involves multiple simulation exercises on security planning and threat assessment in addition to managing simulated airport threats.

Pre-requisite for course registration

1. Must hold a supervisory or management security position in a civil aviation airport
2. Must have a minimum of one to two years' experience in the field of airport security

This programme is intended for security supervisors and managers nominated by a senior executive of their organization.
