

ULMA HANDLING SYSTEMS JOINS THE BUSINESS PARTNER PROGRAM OF ACI AFRICA

ACI Africa welcomes ULMA Handling Systems as its latest Business Partner.

Credentials of ULMA Handling Systems

At ULMA Handling Systems, we design and develop Baggage Handling systems.

Integral baggage handling systems backed by extensive industry experience and a wide range of modular products and solutions that meet the functional need of any airport.

Our solutions are tailored to the specific need of each customer, where we offer services in both domestic airports and renowned international airports.

At ULMA Handling Systems we have more than 35 years of experience and our model makes us unique, because we are a cooperative.

United, with a common aspiration and in a shared company. In our cooperative, every member is important and the wealth of a versatile team is reflected in the result. Because we make our clients' projects our own, working together with a large ecosystem of collaborators and alliances in order to develop the best solution.

People are the essence of our company, responsible people who make each of ULMA's projects their own. Because with us you will be safe in the knowledge that your project is in good hands.

Testimonial by Nacho Ortiz, Director of Baggage Handling Systems at ULMA Handling Systems:

"We have a long history based on commitment and innovation. Because this is the only way to evolve and stay ahead in Baggage Handling systems of the future. Being part of ACI (Airports Council International) will help us to continue on our path".
